Although the game is rather short but a lot of meaning is conveyed. The pictures is also good and its OST are nice and have a calm atmosphere.. For those who are grateful for the togetherness they have Banyu Lintar Angin - Little Storm - made me smile from the beginning to the end. Yes, this little slice of life interactional book consists of only 30 images, but in my opinion it has the perfect length for the story it wants to tell. I definitely don't want to spoil anything, but I totally sympathize with the characters and the story in general. Also, I really enjoyed the backgroundmusic and the artstyle.. Whenever you're feeling down, this adorable game/picturebook's got you covered. I would have like a little more than just leaf animations, but oh well. The simplicity fits well with this slice of life.. As an Indonesian, these illustration made me so happy because all stuff that had done there are actually just like my daily lives environment. With a great family, joyness, kindness, and rural atmosphere made me smiling for every illustration. So recommend it for you want to enjoy some good pictures of rural and sibling environment.. ALL THE ILLUSTRATION .. Relaxing and beautiful minutes.
